**Tests/Final Exam:** We will have a mid-term exam and a final exam. The tentative dates are included in this syllabus. These most likely will not change, but they do I will let you know in class. You are responsible for knowing when each exam will be held. If you know you are going to miss one of our exams, please let me know in advance, and we can schedule a make up. If you miss an exam without letting me know, you will only be able to take a make up if you have a valid excuse.

**Quizzes:** Homework is a very necessary part of this course. You cannot learn something if you do not practice it. There is especially true of mathematics. However, this being said, I will not collect homework. Rather, we will have almost daily quizzes (on some days maybe even two or three quizzes) on the material the homework covered. Your lowest two quiz scores will be dropped. There will be no quiz make-ups.

**Attendance:** I will not include attendance as part of your course grade. I do, however, expect you to attend everyday. You are responsible for any and all material covered in class. If you miss any class, it is up to you to meet with me (if necessary) and catch up on the material you missed.

**Overview:** We will cover parts of Chapters 1, 2, 3, 4, 5, 6 and 7 in our text. On the final exam, you will be responsible for all of the material we covered throughout the semester. I will be more than happy to help you succeed in this course, but it will take effort on your part. I believe that if you (1) come to class, (2) do your homework and (3) ask questions when confused, you will do very well in this class. It is a very good course, and after you finish it you will be well prepared for whatever math course you might take next.

### Important Dates:

Final Date to Add Courses - Friday, June 11
