My office hours are 8:00-9:30 M-F. Please contact me (phone, email, or in person) during these times if you have any questions. If you need assistance at a different time, let me know and we’ll work something out.

**Prerequisite:** Completion of or enrollment in MATH 509.

**Text:** There is no required text. We will use notes posted to Moodle (http://moodle.nicholls.edu/moodle) routinely throughout the semester.

**Course Description (catalog):** Primes, congruences, algebraic number theory, diophantine equations, and theory of algebraic equations. Applications of the theory of number systems to problem solving. Representation of phenomena via finite graphs, recursive relations, and combinatorial structures.

**Course Description (instructor):** This is one of four required MATH courses in the MCCM program. This program is uniquely designed to prepare students to teach mathematics at the community college/technical college level. It is the only program of its kind in the state. However, it is also useful to secondary teachers (providing additional mathematics content-area knowledge) and to students intending further graduate work. It is a very flexible and content-rich program.

In this course, our primary aim will be number theory. We will begin studying numbers in general, and in particular prime numbers, and then progress to congruences and equations. Using these essential tools, we’ll then cover algebraic number theory, which is a mathematical field that studies abstract number systems similar in structure to the rational numbers and the integers. We will study other discrete mathematical objects (such as graphs) as time allows.

A few words need to be said about the Internet aspect of this course. All assignments, notes, announcements, etc will be posted on Moodle. All students enrolled in an Internet course should have basic computer skills (such word processing, e-mail, navigating the Internet, etc). As an online student, you will be somewhat self-paced. This therefore requires self-discipline and self-motivation. The problem sets need to be turned in on time. It is the responsibility of the student to notify the instructor of technical and/or personal problems that may interfere with online participation. All students must check their Nicholls email account regularly (at least once a day). E-
mail will be our primary means of communication. Just like a typical class, instances of academic dishonesty, such as plagiarism, will not be tolerated. Sanctions for such behavior are outlined in the Code of Student Conduct (Section 1.9).

Special Note: Section Five of the Code of Student Conduct, ‘Academic Dishonesty and Disruptive Behavior,’ includes a requirement that faculty file a charge complaint statement with their respective dean whenever a student is confronted or disciplined for cheating. The Office of Academic Affairs will maintain these records, and any student confronted and/or disciplined for multiple offenses of academic dishonesty will be brought before the Academic Affairs Integrity Committee for further review and potential sanctions. Please read the Code of Student Conduct for further details regarding this policy."

Course Outline
I  Prime Numbers
II  Congruences
III  Algebraic Equations
IV  Graph Theory

Course Objectives: At the completion of the semester, a student will be able to:
• test integers for primality
• solve linear congruences
• solve algebraic equations, including diophantine equations
• classify numbers as prime, composite, algebraic, transcendental, arithmetic, perfect, etc...
• classify sets of numbers as a group, ring, or field
• find primitive roots, units, and quadratic residues
• prove theorems of number theory in a variety of methods, including mathematical induction
• evaluate and examine recursive functions
• analyze graphs

Grading Policy: Your course grade will be composed of a problem set grade (70%) and a take-home final exam grade (30%). The problem sets will consist of typical math problems related to the class notes, discussion board participation, and/or independent research. The final exam will essentially be a extended problem set that must be completed without assistance.

At the conclusion of the semester, letter grades will be assigned based on the usual 10% grading scale (A: 90-100%, B: 80-89%, C: 70-79%, etc). Late assignments will not be accepted unless there are VERY unusual circumstances, and make-up exams will only be administered if the student provides a valid excuse. The instructor decides
which excuses are valid and which circumstances are unusual. As I said above, academic dishonesty (i.e. cheating, plagiarism, etc.) will not be tolerated.

**Important Dates**

**Academic Grievances:** The proper procedure for filing grade appeals or grievances related to academic matters is listed in Section 5 of the *Code of Student Conduct* and at the following link: www.nicholls.edu/documents/student_life/code_of_conduct.pdf.

**Continued Learning following an Extreme Emergency:** In order to make continued learning possible following an extreme emergency students are responsible for:

- reading regular emergency notifications on the NSU website;
- knowing how to use and access Blackboard (or university designated electronic delivery system);
- being familiar with emergency guidelines;
- evacuating textbooks and other course materials;
- knowing their Blackboard (or designated system) student login and password;
- contacting faculty regarding their intentions for completing the course.

faculty are responsible for:

- their development in the use of the Blackboard (or designated) software;
- having a plan for continuing their courses using only Blackboard and email;
- continuing their course in whatever way suits the completion of the course best, and being creative in the continuation of these courses;
- making adjustments or compensations to a student’s progress in special programs with labs, clinical sequences or the like only in the immediate semester following the emergency.

**Americans with Disabilities Act** (ADA) Students with a documented disability are entitled to classroom accommodations under the ADA. To receive accommodations, contact the Office of Disability Services at (985) 448-4430 or 158-A Shaver Gym. Additional information can be found at www.nicholls.edu/disability.
